**MC/MM phono stage**

**Chromecast, AirPlay and Bluetooth**

**Stereo pairing**

**Room Ready and MQA**

**Analog and digital inputs**

Leo reimagines what a music system can be. To create Leo—the first in Constellation’s Dominion line of innovative SmartAudioProducts—our engineers and designers started anew. We carefully considered how today’s music lovers listen to and access their music, then sought out the technologies that would let us deliver truly extraordinary sound from a design and form factor welcome in any home—and that are friendly enough for anyone to use comfortably. The result is a music system unlike anything else in audio.

Leo is what music lovers have long awaited: a compact smart music system that delivers the audio you want, any way you want it, without the slightest sacrifice in sound quality, convenience or style.
